Hertel Holiday Walk

The annual Hertel Holiday Walk will take place this December 3rd and 4th

The holidays are coming to the Hertel Holiday Wālk on December 3rd anď 4th of 2021, sponsored by the Hertel Business Association and councilman Joel Feroleto. The Hertel Business Association has presented Hertel Holidays for 20 plus years.

Hertel Ave and all store fronts are decorated for the

Democracy Defeats Socialism

As the son of Ukrainian immigrants I heard firsthand from my grandmother (Baba) and grandfather (Dido) the horrors of living under the Iron Fist of a communist regime. They survived the horrific Holodomor wheat famine that starved millions of Ukrainians to death. Brutal murderer Joseph Stalin stole and hoarded wheat from the "breadbasket of Europe," leaving millions of Ukrainians to die slow, painful deaths. During WWII my Baba and Dido fled their Ukrainian farm with the goal of eventually coming

to America to experience basic freedoms they were never able to have living in a nation that yearned to be free yet was controlled by Communism.

Their journey was pure hell. My grandmother shared stories of traveling only in the darkness of night and hiding in cemeteries by day. No one bombed a cemetery. It was the only safe place for them to hide in plain sight. Here in America they were able to worship our Catholic faith freely, without fear of being punished and imprisoned. They never, ever said a bad

word about the greatest country in the world: the United States of America. That feeling of gratitude for our incredible democracy was passed down to me. I will share my love of our country with my children and grandchildren. Unfortunately some that don't understand the true repugnancy of socialism and communism want to turn America into the same, horrible regime my family fled.

Thankfully these proud socialists were soundly defeated on Election Day here in Buffalo and across the country. These left wing extremists clearly never lived a day in Cuba or Venezuela. Yet they came close to installing a socialist government at Buffalo City Hall. Thankfully smart, informed voters chose wisely. Byron Brown won. India Walton lost. My grandparents would be proud and thankful.

Ask Rusty - Why Is My Medicare Part B Premium So High?

Dear Rusty: Social Security is deducting \$297 per month for my Medicare Part B coverage. I have what's called a "Windfall Elimination Provision" because I receive a pension from my former State employer. Prior to my 65th Birthday in July of this year, Social Security was paying me \$764 per month, but when I turned 65, they reduced my amount to \$467 per month. I read that the Part B premiums for 2021 are \$148.50, so I wonder why I'm paying double that amount? Could it be that I never enrolled in Medicare Part B, and they just automatically started deducting that amount? Some sort of penalty? If so, it seems kind of high. Can you explain why I'm paying so much for Medicare Part B? Signed: Curious About Medicare

Dear Curious: Your Part B premium of \$297/month has nothing to do with the Windfall Elimination Provision (WEP). WEP affects (reduces) your Social Security retirement benefit amount but doesn't affect your Medicare premium. Your Medicare Part

B premium is \$297/month because of a different Medicare rule known as "IR-MAA," which is the "Income Related Medicare Adjustment Amount." Here's how IRMAA works:

Medicare determines your Part B premium amount each year using your combined income (from all sources) from 2 years prior, so your 2021 Part B premium is based upon your 2019 income. The income amount used to set your Part B premium is called your Modified Adjusted Gross Income (MAGI), which is your normal Adjusted Gross Income on your tax return plus any other non-taxable income you may have had (including half of your SS benefits, non-taxable interest, etc.). If your MAGI is over a certain threshold, your Part B premium is more than the standard \$148.50.

The IRMAA thresholds at which you pay a higher Part B premium depend upon your tax filing status. A married couple filing jointly with MAGI under \$176,001 pays the standard premium (\$148.50 for 2021), and a single tax filer whose MAGI

is under \$88,001 also pays the standard Part B premium, but income exceeding those thresholds means a higher Part B premium. How much higher depends upon how much your MAGI exceeds the base amounts above. The Part B IRMAA premium increases on a scale relative to how much your MAGI exceeds the base threshold, and, from what you've shared, it appears that your 2019 MAGI resulted in a 2021 Part B

premium of \$297/month.

Since you were already collecting Social Security when you turned 65, you were automatically enrolled in Medicare Part A (which is free) and Medicare Part B (for which you pay a premium), which is why your Medicare premium increased at that time. If you also have "creditable" healthcare from either your or your wife's employer ("creditable" is a group plan with at least 20 partici-

pants), you can dis-enroll from Medicare Part B by filing form CMS-1763 and having an interview with Social Security. That way, you could save that \$297 monthly Part B premium for as long as you have other "creditable" employer coverage, and then re-enroll in Part B during the Special Enrollment Period, which starts when your employer coverage ends (or shortly before to avoid a gap in healthcare coverage).

To Be Or Not To Be

With all the controversy about the mandates for the covid vaccine, just thought I would put my two cents in. It is and has been a main topic in the news and affects everyone. Since columns are opinions and not news this is not based on any facts just memory of the things I have seen.

First, I do recall as a young child standing in line to get a vaccination for smallpox. Who knew at that early age what that was all about? It was mandated as I know everyone had it. Cannot recall if it was before starting school or after kindergarten. Do know the shot hurt and left a scar on your arm. Easy to tell if you were vaccinated as this dimple on your arm was there for years. Nobody objected as the smallpox epidemic was said to be bad. The thing was that if you got the shot you did not get smallpox. It was totally

As I was growing up polio was another dreaded disease until they discovered a vaccine to prevent it. Most will recall that President Theodore Roosevelt had polio. Again, by memory I recollect that if you got polio you ended up in an Iron lung. It was a horrible experience. Jonas Salk developed a vaccine that would prevent contracting polio. The vaccine was welcomed with open arms. It affected younger people and by this time I was older, but the polio vaccine was mandatory in younger children. Again, it wiped out the epidemic as it worked 100%.

With those two in mind, we wonder why there is so much back and forth with the vaccine against covid 19. If those were mandated, why is there a question on this vaccine? From what I see, and this is just an opinion and only observations. We knew from the begin-

ning that the vaccine is not 100%. We now know that even if you are vaccinated you can still get the virus.

Personally, I have had two employees and a son that were fully vaccinated and got the virus. Even talked to a nurse who said she was mandated to get the vaccine and got the virus and was sick. All these people survived, and they say it is because they got the vaccination. Is that true or is it because the treatments are better than they were? Which brings up another question. Who do you believe? They claim the death rate is higher amongst those who are not vaccinated.

If this is an end all to the virus, why would anyone object to getting a shot? There are cases and I know of one where he got the first shot a year ago and is still sick from it. Not hearsay as I know the person. He never got the second shot as he has been sick for a year. That could be rare, but you would never hear about it as it would put fear into people about receiving the vaccine. Must wonder though as there are many medical people who are anti vaccine. Do they know something we do not know?

There are positive signs that we see and are definitely happy about, after what we have had to encounter these last two years. Life is slowly returning to normal again. The economy is starting to return. Restaurants are open, stores are open, stadiums that once were empty and silent are again filled with adoring fans and players. Do we have the vaccine to thank for that? It would seem so but then again why would there be a reluctance to get vaccinated?

We must hope the epidemic is over and, in the coming years, it will be just a memory like small-pox and polio. No matter how we look at it, the vaccine has had an influence in our lives. So, get vaccinated, if you choose.
